Silvet® AD Ultra

Product Guide

www.silberline.com

Silvet® AD Ultra

As innovative as always Silberline are pleased to offer the new standard for brilliance in milled aluminium pigments.

New milling technologies and techniques have allowed our development experts and formulators to produce a dazzling array of pigments that are brighter than ever before whilst offering excellent opacity. This allows inks to provide wonderful eye-catching effects with cost effective prices and problem-free printing. The Silvet AD Ultra grades extend the ever popular Silvet AD range of products for increased adhesion and these brilliant effects are partnered by unparalleled opacity.

These new non-leafing pigments offer an exciting development for labels and packaging, particularly on film where ultra bright metallic effects can be achieved on second side applications. They are also widely compatible with a wide range of resins used in flexo and gravure liquid inks.

Feature	Benefit
New advanced silver dollar technology	Ultra bright aesthetic effects
Increased adhesion properties on film, paper and board	Excellent adhesion, non-split and lamination properties for printing on all substrates
Outstanding opacity	Brilliant effects achieved in one-hit, even with low pigment loading
Narrow particle size distribution	Increased print stability even at high speeds
Non-dusting, granular product packed in anti-static liners	Safe to handle and no air freight restrictions
Solvent-free	Low odour, low VOC
Aldehyde resin carrier	Widely compatible in most liquid ink formulations

Silvet® AD Ultra

Together we brighten our world!
